SCHEDULE

The location and details of matters which are considered to be failures to comply with the Regulatory Reform (Fire Safety) Order 2005 are detailed, along with the steps considered necessary to remedy the failures.

1 Failure under Article 9 of the Regulatory Reform (Fire Safety) Order 2005.
(The responsible person must carry out a suitable and sufficient fire risk assessment. This risk assessment must identify the general fire precautions needed to comply with the legislation).

1.1 Failure

The responsible person has failed to carry out a fire risk assessment for the premises.

Remedy

The responsible person must make a suitable and sufficient assessment of the fire related risks to which relevant persons are exposed and identify the general fire precautions that need to be taken to comply with the published guidance.

DATE REQUIRED - 14 April 2023

Supporting Information

Your risk assessment should adequately address the needs of all people, including disabled people who may be on the premises and ensure that they can safely leave the building in the event of a fire.

For the purposes of identifying the measures to be taken to comply with the relevant legislation, information on how to carry out a fire risk assessment has been published by HM Government in the form of a series of fire risk assessment Guides for different uses of premises. They are available for free download at: <https://www.gov.uk/workplace-fire-safety-your-responsibilities/fire-safety-advice-documents> or can be purchased at bookshops. The guide relevant for your premise is **Sleeping Accommodation**.

If the responsible person feels that they do not have the necessary experience or expertise to do this, they must appoint one or more competent person(s) to assist them in identifying the general fire precautions needed to comply with the requirements and prohibitions imposed by this Order. Where an employee is deemed to be a competent person they should be appointed in preference to someone from outside of the workforce.

2 Failure under Article 8(1)(a) & 8(1)(b) of the Regulatory Reform (Fire Safety) Order 2005.

(The responsible person must take such general fire precautions as will ensure the safety of all persons present).

2.1 Failure

The responsible person has failed to take measures to reduce the risk of the spread of fire and smoke throughout the premises.

Remedy

Carry out a full compartmentation survey to identify areas that require fire stopping, including the point where services penetrate the floor.

Ensure all internal fire resisting doors, except those for toilets, leading onto the means of escape (or alternatively their respective door frames) are fitted with self-closers, intumescent strips and cold smoke seals.

DATE REQUIRED - 14 April 2023

Supporting Information

The door to the kitchen does not have a self-closing device fitted. The door is an integral part of the protected route or means of escape on the from the upper floors providing 30-minute fire protection and fitted with the appropriate door furniture.

The door to the front bedroom on floor 1 was not closing on its self-closer due to catching on the carpet. Ensure all doors to all bedrooms close effectively on their self-closers are a good fit in their frame.

The door to the electrical cupboard is not of fire-resistant construction. The door along with the structure of the cupboard is an integral part of the protected route or means of escape from the upper floors. It should provide 30-minute fire protection and the door fitted with the appropriate door furniture.

3 Failure under Article 14(2)(b), and 14(2)(h) of the Regulatory Reform (Fire Safety) Order 2005.

3.1 Failure

The responsible person has failed to ensure that adequate emergency lighting is provided within the emergency exit routes of the premises.

Remedy

Provide emergency lighting throughout the common parts of the premises in accordance with the current BS 5266: Part 1 and the findings of your Fire Risk Assessment.

DATE REQUIRED - 15 June 2023

The Fire Authority considers that the above detailed steps will reduce the excessive risk to an acceptable level in the premises. Alternative ways of achieving an equivalent standard may be available and any request for the Fire Authority to consider alternative proposals should be submitted as a matter of urgency.
